History has demonstrated time and again that, to the degree citizens are unarmed, government suppression and tyranny are inevitable. The Founders of the United States knew these lessons well. This is why the U.S. Constitution not only acknowledges and guarantees American citizens the right but the duty to keep and bear arms. But this duty, as well as the militia, are often misunderstood. As a result, a "gun-control lobby" has been steadily eroding the original intent of the Founders by passing illegal gun control "laws," funding a standing global army, and destroying the 300-year old militia system established by WE THE PEOPLE. MOLON LABE explores the "Power of the Sword" and how it guarantees American's freedom. MOLON LABE is inspired by the book, *The Sword and Sovereignty*, by Edwin Vieira, Jr.
